

Walk The Trail!

approximately 1/2 mile

1 "The Fishing Lesson"
This bronze sculpture created by Paul Rhymer mirrors the teaching relationship of parent and child while also subtly educating onlookers about the chain of life and the importance of teaching self-sufficiency. Visit the Museum of Fine Arts for the accompanying children's book about the bears!

2 "Pod"
This solid, white granite sculpture was hand-carved by Richard Deutsch in Italy where Michelangelo's studio was located. Inspired by both the re-birth of nature and the ruins of Rome, this modern work is the marriage of art and environment. It invites interaction and creative play.

3 Community Art
This green space features temporary community art.

7 "Railroad Switch"
Stroll down the Trail and see the plasma-cut weathering steel fence that invokes memories of the rail yard switches that once ran through the area. Artist Vicki Scuri designed this functional fencing, which seems to move and pulse in the sunlight as you pass it.

8 Mural of Unusual Size – "Building Blocks"
Internationally recognized contemporary public artist and award-winning painter HENSE transforms this former industrial building into a creative work of art that combines techniques of street art and abstract painting.

11 "Faces of Hagerstown"
These black-and-white photos capture the truth and life of Hagerstown through the people who live, work, and play here. These candid images are submitted by all levels of photographers — from the iPhone amateur to the seasoned pro.

12 "This Little Light of Mine"
A great location for "selfies", this mural by Eric B Ricks depicts geometric designs, the beauty of nature, and "Maryland" themes in honor of the nearby University. Look for the string art and the 3D butterflies.

4 "PhotoMarathon"

9 "Möller's Sustained Wind"
A tribute to our local industrial past

5 "The Fantastical Garden"
Explore this interactive play area that features garden you thought could only exist in your imagination! Fantastical flora designed by artist Alison Sigethy have some elements of surprise. Take a closer look to see what "lives" among the garden! The work is complemented by a butterfly garden, native rocks, and a trickling water feature.

6 "Rivulet"
An interactive sculpture by Beneffel/McKibbin, the forms of this piece imply movement or current flowing along the Trail, similar to a river. Cast aluminum chairs ride the current and the viewer is welcome to place themselves either mentally or physically in the flow.

10 "Rise"
Adam Curtis designed a steel sculpture that frames various perspectives of the city-scape, depending on where the viewer is situated. The Herald-Mail Plaza also offers a place for gathering and resting under decorative shade structures.

PLEASE PLAY!
Art along the Trail is designed to be interactive. Just be careful!

- PUBLIC PARKING**
- A&E District Parking Deck / 25 Renaissance Way
 - City Parking Lot / 36 W. Antietam Street
 - Columbia Bank Parking Lot / 44 W. Antietam Street
